

Objection against the conversion of the marshy areas “AIGUAMOLLS” into a dry area!

The Generalitat Cataluna, possible upon a request from Rosas, has the protected marshy grounds opposite the shipyard “Nautic Center” declared a dry area.

This will further the possibility to build on the so far Natural Park protected area.

As already reported it allows the Rio Grao to be converted into a canal, the creation of a mole, the illegal area were today boats are lying will be developed and houses to erected .

The estuary with the existing mole will be converted into a big Port entrance.

The natural protected area and with it the rich flora and fauna will disappear, birds will be scared off their nesting areas.

Migrating birds will loose their feeding areas.

The marshy grounds of the Aiguamolls serve as flooding area by high water and annual strong rainfalls.

After the canalisation there exists a real danger that our plots will be flooded during rains.

To prevent any detriments to us the APA through the junta will object against the conversion.

To demonstrate strenght our members should object also. You will find a written form for the objection under

<http://www.euroclub24.com/pdf/RecursoPDTTCG091110.pdf>

Which you can use.

As always it is urgent, the objections have to be mailed auntil the 14.11.2010 (poststamp) per registered mail!
