

Socialist capos are nervous because they have sold our moorings and those of Empuriabrava, to the aspiring concessionaires, it seems, they are claiming the pledge.

We knew that they wanted to steal our moorings (remember the draft legalization) and, as we resist, they turned to the implementation of the Coastal Act, instead of solving the problem for them, it has been made worse.

The proposed business, by Rios, is a farce to acquire our moorings. To do what he says would mean amending Law of Coasts and there is not time or the necessary majority in Congress and Senate. Download:

The only thing the Coastal Ministry can do is to accept the annulment of the boundary or await the court ruling. Our moorings are now not ours, nor of the Coastal Ministry, nor the Catalan Government, they belong to the Treasury.

Mr. Cordero has already come to Roses to ask us to withdraw the litigations in order to negotiate.

The grant is a deception, because they can redeem for 20 cents at any time. Unless we go to court on time.

The town council with whom Mr. Rios came to negotiate are outgoing

It is necessary to go to court to try to send to jail, this gang of arrogant thieves (now that we can) and their accomplices concessionaires, to let us live in peace.
